Starlion matric higher secondary school, ayyampet-614201

percentage of 10th - 77%

## Certifications

Modern React with Redux completed in udemy

The complete React native and hooks completed in udemy

## Objective

"I am looking for an entry-level position to kickstart my career in web & mobile app development. I wish to work in a dynamic organisation that will contribute to my professional and personal growth while I contribute to the growth of the company as well as engage in opportunities to further the company's goals."

## Technical skills

I'm a MERN stack developer and developed a lot of beginner level projects such as Tic Tac Toe, Todo app, small frontend website etc in my learning period. I'm comfortable with the following stuff

- HTML
- CSS
- Javascript
- React js
- React Native
- Material ui
- Node js
- Express
- Mongo db
- Firebase

## Projects

### ● Netflix clone

This was my react first project its netflix-clone and in this application have authentication feature by using firebase auth, and some of other libraries like router for routing and redux for state management

<https://netflix-clone-basith.netlify.app/>

### ● Whatsapp-clone

This appliaction is fully mern stack build and its allows user to send text and image to other users and its also have authentication feature by using node js and jwt and some of other libraries used in this project like pusher for sendig a message to real-time, router for routing and to store a image in firebase firestore

<https://whatsapp-clone-basith.netlify.app/>

### ● Bascart

its e-commerce application and its also mern stack application and its have authentication features by using node js and JWT and using redux for state management and material ui,this application also have admin dashboard for add,update and delete the products

<https://e-commerce-basith.netlify.app/>

### ● Basfood

This is a full stack mobile application by using React native and this have a late of features like check order history and track the order in realtime and smooth animation for better user experiance ,late of the package using for this projects like Socket.io for making this app realtime order tracking and react navigation for routing ,jwt for authentication token and redux for statemanagement and this also have the adminpanal to control the application you can check demo of the application via click this link in below to watch the video in youtube
